Summary

Zubair Idris Aweda is a results-driven software engineer with experience in full-stack web development. Zubair is skilled in a variety of programming languages and frameworks, including PHP, Laravel, MySQL, JavaScript, Node.js, and TypeScript. Zubair is committed to delivering high-quality, scalable solutions that meet the needs of users. He has a strong track record of collaborating with cross-functional teams to deliver successful software products.

Experience

✂ Mid-Senior Full-Stack Engineer (PHP)

Stax Payments

Jun 2022 - Oct 2023 (1 year 5 months)

- I actively created and updated internal and public-facing documentation for services.
- I consistently maintained the core application services, swiftly addressing any emerging bugs.
- I pioneered the development of new application features by producing high-quality and scalable code, complemented by rigorous unit testing.
- I adeptly adapted database models to seamlessly integrate new features.
- I collaborated with the UX team to engineer exceptional user interfaces.
- Partnering with the QA team, I ensured the impeccable quality of each feature.
- I reviewed and approved code authored by fellow engineers.

Software Engineer

AYU Digital Ltd.

Jan 2022 - May 2022 (5 months)

- I initiated and managed notification services, orchestrating a diverse range from email notifications via Mailgun to push notifications through Firebase and SMS notifications using Twilio.
- I took charge of user authentication and verification, leveraging Twilio's APIs for mobile number verification.
- I devised an innovative data export algorithm, gathering interconnected data from tables, formatting it into CSV or JSON, and promptly delivering it to users.
- I introduced a user import feature, providing site administrators with a seamless process to upload CSV files containing user data to the platform.
- I seamlessly integrated Stripe, enhancing the platform's functionality by facilitating smooth and secure payment transactions.

Software Engineer

Humongous.io

Mar 2021 - Jun 2021 (4 months)

- I developed unit and integration tests to detect bugs and address issues, ensuring a smooth application launch.

- I authored code fixes and enhancements, contributing to future code releases and patches.
- I debugged and modified software components on both the frontend and backend, utilizing Typescript for effective solutions.
- I reviewed and approved code created by fellow engineers, ensuring code quality and adherence to standards.

Junior Backend Engineer

CitonHub

Nov 2020 - Jan 2021 (3 months)

- I maintained and updated the core features of the application.
- I collaborated closely with a senior developer to implement essential application features and functionalities using Laravel and VueJS.

Web Developer

CodeTouch Technologies

Dec 2019 - Nov 2020 (1 year)

Licenses & Certifications

 **JavaScript Algorithms and Data Structures** - freeCodeCamp
